

What I claim as my invention is:

1. A computer system for taxi drivers or other hired drivers comprising:
  - (a) a main computer, the main computer preferably located at a central location, the main computer including a radio wave transmitter capable of transmitting radio waves to at least one device screen, and
  - (b) a plurality of device screens, each device screen including a radio wave receiver, the radio wave receiver capable of receiving and displaying information received from the transmitter on the main computer, each device screen being located within a taxi or other hired vehicle, each device screen including a front-mounted screen, each device screen further including a plurality of front-mounted operations buttons, each device screen further including an on/off button, and each device screen further including a printer port.
2. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the plurality of front-mounted operations buttons on the device screen would include a delete button.
3. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the plurality of front-mounted operations buttons on the device screen would include a print button.
4. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the plurality of front-mounted operations buttons on the device screen would include a view button.

5. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the on/off button would be side-mounted on each device screen.
6. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the printer port would be side-mounted on each device screen.
7. A computer system for taxi drivers or other hired drivers according to claim 1 in combination with at least one printer, the printer being electronically connected to the printer port on a device screen.
8. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the software used for the computer system would be the AGS driver computer system.
9. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the information displayed on a device screen would include reports.
10. A computer system for taxi drivers or other hired drivers according to claim 1 wherein the information displayed on a device screen would include road maps.
